

Information technology - Computer Systems and Network Engineering

Form of study: Full-time

English Engineering degree

Key program features

Selected specialized classes:

Programming Languages in Managing Systems and Computer Networks

Routing and Switching

Fiber Optic, Wide Area and Wireless Networks

Software-Defined Networks and Network Device Virtualization

Telecommunication and Multimedia Networks

Design and Security of Computer Networks

Storage Area Networks

Network Servers and IT Services

Cloud Computing Architecture

Distributed Systems and Blockchain Computing

Innovative Individual Project

Innovative Team Project
