What else should you know?

The e-commerce developer studies are the result of cooperation between the University of Lower Silesia and IT-Corner - a Wrocław cluster of new technologies associating over 60 companies that are united by joint work for the local development of new technologies.

The combination of the knowledge of experts from DSW and practitioners from the e-commerce industry resulted in the creation of a new educational proposal. The offered specialization will fill the gap in the Wrocław IT education market.

Electronic commerce, or e-commerce, is an economic sector that is growing at a very high pace. Currently, there is a shortage of graduates with competences in the field of creating mobile and web applications for this sector, as well as e-commerce specialists and analysts.
