**(Not)available
counselling actions in
the migrant and refugee
environment in France,
Poland and Australia**

EDITO

Created in 1996 on the CNRS campus in Orleans La Source, LE STUDIUM has evolved to become the multidisciplinary Loire Valley Institute for Advanced Studies (IAS), operating in the Centre-Val de Loire region of France. LE STUDIUM has its headquarters in the city centre of Orleans in a newly renovated 17th century building. The amazing facilities are shared with the University of Orleans. In 2014 new developments and programmes linked to the smart specialisation of the Centre-Val de Loire region came to strengthen existing IAS collaborative relationships with the local and the international community of researchers, developers and innovators.

LE STUDIUM IAS offers to internationally competitive senior research scientists the opportunity to discover and work in one of the IAS's affiliate laboratories from the University of Tours, the University of Orleans, National Institute of Applied Sciences (INSA) Centre Val de Loire and ESAD Orléans, as well as of nationally accredited research institutions located in the region Centre-Val de Loire (BRGM, CEA, CNRS, INSERM, INRAE). Our goal is to develop and nurture trans-disciplinary approaches as innovative tools for addressing some of the key scientific, socio-economic and cultural questions of the 21st century. We also encourage researchers' interactions with industry via the IAS's links with Poles of Competitiveness, Clusters, Technopoles, and Chambers of Commerce etc.

LE STUDIUM has attracted more than two hundred and eighty experienced researchers coming from 49 countries for long-term residencies. In addition to their contribution in their host laboratories, researchers participate in the scientific life of the IAS through attendance at monthly interdisciplinary meetings called LE STUDIUM THURSDAYS. Their presentations and debates enrich the regional scientific community at large (researchers of public and private laboratories, PhD students, research stakeholders' representatives, etc...)

For the period 2015-2021, LE STUDIUM has operated with an award from the European Commission, a programme supporting the mobility of international researchers, the Marie Skłodowska-Curie Actions (MSCA) COFUND programme.

For the period 2022-2025, LE STUDIUM has joined the FIAS Programme (French Institute for Advanced Study) along side six other institutes in France, also supported by the MSCA Actions. Since 2013, LE STUDIUM is also an official partner of the Ambition Research and Development programmes initiated by the Centre-Val de Loire Regional Council to support the smart specialisation strategy (S3) around priority domains: biopharmaceuticals, renewable energies, cosmetics, environmental metrology, digital twins, materials, forestry and natural and cultural heritage. Furthermore our current collaboration with the ATHENA European University Consortium allows us to welcome fellows from ten European partners universities. New programmes are currently designed to include all major societal challenges.

Researchers are invited and supported by the IAS to organise, during their residency and in collaboration with their host laboratory, a two-day LE STUDIUM CONFERENCE. It provides them with the opportunity to invite internationally renowned researchers to a cross-disciplinary conference, on a topical issue, to examine progress, discuss future studies and strategies to stimulate advances and practical applications in the chosen field. The invited participants are expected to attend for the duration of the conference and contribute to the intellectual exchange. Past experience has shown that these conditions facilitate the development or extension of existing collaborations and enable the creation of productive new research networks.

The present LE STUDIUM CONFERENCE named «*(Not)available counselling actions in the migrant and refugee environment in France, Poland and Australia*» is the 138th in a series started at the end of 2010 listed at the end of this booklet.

We thank you for your participation and wish you an interesting and intellectually stimulating conference. Also, we hope that scientific exchanges and interactions taking place during this conference will bring opportunities to start a productive professional relationship with presenting research laboratories and LE STUDIUM Loire Valley Institute for Advanced Studies.

Yves-Michel GINOT

Chairman
LE STUDIUM

INTRODUCTION

This seminar is focused on the institutional availability, partial availability or the absence of practices, actions, counselling relations and other forms of support addressing refugees and migrants, as well as on the practices constructed nonformally by them (rooted in daily life). By comparing and demonstrating the specifics of international and transnational counselling and other forms of support, particularly in France, Poland and Australia, we will refer to those helping social actions that are initiated by migrants and refugees, and we will understand the meanings ascribed to these actions. We will answer questions such as, how these migrants and refugees evaluate these practices, what counselling and other helping networks they build, what changes take place in these networks, what is the counsellors' and helper`s place in these networks and who they are.

WITH THE SUPPORT OF

The French Institutes for Advanced Study Fellowship Programme

The French Institutes for Advanced Study Programme* offers 10-month fellowships in the seven institutes of Loire Valley (Orléans-Tours), Lyon, Marseille, Montpellier, Nantes, Paris and Rennes. Initiated in 2020, the FIAS Fellowship Programme will run until the 2024-2025 academic year. It welcomes applications from high-level international scholars and scientists wishing to develop their innovative research project in France.

The call is open to all disciplines in the social sciences and the humanities (SSH) and relating to all research fields. Research projects in other sciences and in arts that propose a strong interaction and dialogue with the SSH are eligible. Some host institutes have scientific priorities that need to be taken into full consideration before applying. At LE STUDIUM Loire Valley institute, interdisciplinary projects will be positively considered in the selection process.

Identically to all LE STUDIUM programmes, the FIAS Fellows are free to organise their research while benefiting from the support and conducive scientific environment offered by the institute characterised by a multidisciplinary cohort of fellows and by close relation to the local research centres and laboratories.

To be eligible, applicant researchers must be nationals or long-term residents of a country other than France and comply with the European mobility rules. For applications targeting LE STUDIUM, the preliminary acceptance into a host laboratory and/or host enterprise based in the Centre-Val de Loire region is necessary.

The annual call for applications opens every year in the month of April. Applications must be completed online on the FIAS website. Applications submitted by email will not be considered nor evaluated.

*This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 945408

PROGRAMME

TUESDAY 6TH FEBRUARY, 2024 (PARIS TIME, GMT +2)

09:10 Prof. Philippe Bourdier, Dr Aneta Slowik, Dr Veronique Francis & Sophie Gabillet - Official opening

09:30 Dr Kate Golebiowska - Institutional Support in Action: How Start:ME Micro-Business Accelerator Impacts Migrant and Minority Women Entrepreneurs In Atlanta, USA?

10:00 Questions / Discussions

10:15 Prof. Martine Lani-Bayle - Migrations-refuges et résiliences, quels liens ?

10:45 Questions / Discussions

11:00 Short break

11:15 Dr Veronique Francis - Développer les approches anti-racistes en éducation et en formation: enjeux, outils, démarches

11:45 Questions / Discussions

12:00 Lunch break

13:30 Dr Anna Bilon-Piórko - Career guidance for immigrants and refugees as the way to social inclusion. Current trends and challenges

14:00 Questions / Discussions

14:10 Dr Aneta Slowik - Quels réseaux de counselling pratiques existent parmi les réfugiés Ukrainiens dans le département du Loiret (France) ?

14:45 Questions / Discussions

15:00 Short break

15:15 Dr Camila Aloisio Alves - Parcours de vie et ses tessitures : l'approche biographique et la construction des apprentissages expérientiels

15:45 Questions / Discussions

16:00 Dr Aneta Slowik & Dr Véronique Francis - Discussions/Questions/Conclusion

16:30 End of the workshop

CONVENORS

Dr Aneta Slowik

LE STUDIUM / FIAS RESEARCH FELLOW
FROM: University of Lower Silesia, Wrocław - PL

Research Team on Contexts and Education Actors (ÉRCAÉ),
University of Orléans - FR

72 rue du Faubourg de Bourgogne,
45000 Orléans - FR

Email: aneta.slowik@dsw.edu.pl

After defending her PhD thesis in 2011, Dr Aneta Slowik took the position of a lecturer and researcher at the University of Lower Silesia in Wrocław, Poland. Since then, she has been working in the field of migration and counselling studies, with focus on counselling activities targeted at migrants. Dr Slowik's work is published in three languages- Polish, French, and English. She maintains contacts with French academic researchers by being a member of the Scientific Publishing Board of «Harmattan» in the L' Histoire de vie network reviewing submitted scientific texts. Dr Slowik is also a member of the Scientific Council of the Association «L'Association internationale des histoires de vie en formation et de recherche biographique en éducation (ASHIVIF). She has organized and hosted several international conferences in Poland and has taken part in conferences for the French-speaking academic community. Actively participates in international university projects.

Dr. Slowik has published two monographies in Polish language (2013, 2016) focused on Polish immigrants in the UK and their transnational counselling networks. She has published 23 articles in Polish, French and English and 21 chapters in other monographies. Dr Slowik is an editor of 3 academic journals in Polish and French and 11 monographies. Her research was supported by three academic grants: DAAD (Germany) in 2016, KAAD (Germany) in 2017, and BGF (scientific scholarship from the French Government) at the West Catholic University in Angers in 2020. Her work has been awarded two times by the Rector of the University of Lower Silesia (2017, 2019).

Prof. Philippe Bourdier

Research Team on Contexts and Education Actors (ÉRCAÉ),
University of Orléans - FR

72 rue du Faubourg de Bourgogne,
45000 Orléans - FR

Email: philippe.bourdier@univ-orleans.fr

Philippe Bourdier is a researcher at the University of Orléans on issues of education, training and arts sciences. He is director of the ERCAE research unit at the University of Orléans. He is a specialist in epistemological and historical questions in the teaching of french and cinema.

SPEAKERS

Dr Kate Golebiowska

Charles Darwin University / University of Florida - Center for Arts, Migration and Entrepreneurship (Affiliate)

Ellengowan Drive
Brinkin NT 0909 - AU

Email: kate.golebiowska@cdu.edu.au

Kate Golebiowska, a Senior Research Fellow at Charles Darwin University, studies migrants' economic and social participation. Her work draws on migration studies, demography, human geography, entrepreneurship, and workforce development. Through peer-reviewed articles, reports and book chapters Kate has provided innovative insights into the effects of international migration on regional population dynamics and the strategies influencing migrant settlement and integration outcomes. As a Fulbright awardee at Emory University in Atlanta (spring 2023), she shadowed the Start:ME Accelerator and studied its impact on women microentrepreneurs from migrant and minority backgrounds. Additionally, Kate contributes to the field as the Vice-President of the Australian Population Association.

Institutional Support in Action: How Start:ME Micro-Business Accelerator Impacts Migrant and Minority Women Entrepreneurs in Atlanta, USA?

In this presentation, I share findings from research I conducted in 2023 with Start:ME, an accelerator program for micro-entrepreneurs from diverse and low-income areas in Atlanta delivered by Emory University and its community-based partners. Most participants in Start:ME are women with migrant and minority backgrounds. Through an analysis of formal and informal relationships within Start:ME, involving participants, volunteer business mentors, program management, and other supporters, I highlight how these connections complement the program's content. I discuss the pivotal role of these relationships in fostering micro-entrepreneurship among migrant and minority women and explain their enduring (though evolving) nature beyond the program's completion. Additionally, I delve into the meanings participants ascribe to institutional actions, the evaluation of these actions, and how they are positioned both as recipients of institutional support and agents in their own right. Through this analysis, I shed light on the expanded economic opportunities, enriched social capital and greater resilience experienced by women of migrant and minority backgrounds participating in Start:ME.

Prof. Martine Lani-Bayle

Retired from the University of Nantes

43 rue du Barry
82250 Laguépie - FR

Email: lani-bayle.martine@orange.fr

Psychologue clinicienne auprès d'enfants en difficultés de vie de 1974 à 1994. Puis Maître de conférences à l'université de Nantes et, de 1999 à 2018, Professeure en Sciences de l'éducation.

Étude de la genèse du rapport au savoir, envisagé et étudié en rapport avec le contexte de vie, notamment extrême (résilience). Recherches sur les modalités du récit d'expérience et le rapport à l'écriture de la personne apprenante (enfants à seniors), dans une perspective clinique-dialogique transdisciplinaire et complexe.

29 docteurs. Création, de 2000 à 2016, d'un Diplôme d'Université et d'une revue (*Chemins de formation*).

Publication de 38 ouvrages et de nombreux chapitres ou articles.

Ces travaux s'inscrivent dans une dimension internationale (Brésil, Pologne, Japon, Suisse, Belgique, Québec...).

Migrations-refuges et résiliences : quels liens ?

Les migrations obligées font suite à des situations extrêmes laissant les personnes, au-delà des conditions d'accueil rencontrées dans le pays «refuge», en grande difficulté pour trouver à se reconstruire dans un environnement inconnu ou pouvant être ressenti comme hostile...

C'est là qu'on imagine la quasi nécessité, pour eux, de la mise en œuvre d'un processus de résilience, que certains souhaiteraient pouvoir les aider à activer.

Mais celui-ci ne se laisse pas commander et échappe à la volonté ou aux prévisions, il est également variable selon les personnes et leur façon de vivre les situations. Certaines, par exemple, présentent un esprit *nomade* et se sentent vite «chez elles» dans un lieu nouveau même non choisi, alors que d'autres, plutôt *sédentaires*, sont perdues dès qu'elles s'éloignent ; certaines sont dépendantes de leur environnement et de tout ce qui s'y produit, alors que d'autres sont moins perméables et peu affectées par ce qui les entoure. L'on peut donc concevoir que les modalités de résilience possible varient en fonction de telles caractéristiques, qui touchent à la vulnérabilité de chacun.

Nous présenterons ces diversités montrant combien il est important, pour tout contexte d'accueil, de tenir compte de la connaissance des personnes migrantes et de leurs spécificités, afin proposer un accompagnement optimal adapté à leur situation et besoins propres

Dr Véronique Francis

**Research Team on Contexts and Education Actors (ÉRCAÉ),
University of Orléans - FR**

72 rue du Faubourg de Bourgogne,
45000 Orléans - FR

Email: veronique.francis@univ-orleans.fr

Véronique Francis est titulaire d'un doctorat en Sciences de l'Éducation et de la Formation de l'Université Paris-Nanterre. Elle enseigne à l'Institut National Supérieur du Professorat et de l'Éducation à l'Université d'Orléans (France) où elle est membre de l'Équipe de Recherche Contextes et Acteurs de l'Éducation (ERCAE). Elle est également chercheuse au Centre de Recherche en Éducation et Formation (CREF) à l'Université Paris-Nanterre. Ses recherches dans le champ de l'Éducation Familiale explorent les usages numériques dans les familles et la communauté éducative ; les approches éducatives avec, par et dans la nature. Depuis 2010, elle étudie la prévention des discriminations ethnoraciales dans une approche comparée France-Brésil. Elle est rédactrice en chef de la Revue Internationale de l'Éducation Familiale dont le numéro 52 Contextes pluriculturels et prévention du racisme, fait une large place aux épistémologies du Sud.

Développer les approches anti-racistes en éducation et en formation: enjeux, outils, démarches

La Déclaration des Nations Unies et le Programme d'action de Durban de 2001 et 2009, visent à accentuer la lutte contre le racisme, les discriminations et la xénophobie tout comme les formes d'intolérance et de violences qui y sont associées. Le racisme a des conséquences multiples sur les plans économiques, psychologiques, sociales, culturelles, symboliques. Les discriminations entraînent rejet, agressivité, stress, exclusion, ressentiment... et affaiblissent l'estime de soi. Elles entravent le bien-être des enfants, des parents et des professionnels tout en affectant le climat des établissements éducatifs et scolaires. La reconnaissance des discriminations confirme la légitimité d'une prise en compte des stéréotypes et préjugés. Ceux-ci coexistent avec le néo-racisme et affectent les rapports sociaux dans les sociétés post-coloniales du Sud et du Nord. Les secteurs de l'éducation et de la formation font face à une demande croissante d'éduquer sans discriminer (Francis et al., 2018) qui se déploie selon de nouvelles perspectives. L'objectif de cette conférence est d'examiner les approches antiracistes en soulignant d'une part l'engagement progressif des institutions pour la diversité ethnoculturelle et, d'autre part, l'importance de la circulation des récits dans la lutte contre le racisme et pour la justice épistémique.

Dr Anna Bilon-Piórko

DSW University of Lower Silesia

Strzegomska 55
53-611 Wrocław - PL

Email: anna.bilon@dsw.edu.pl

Anna deals with the analysis of career guidance and adult education. She analyses career guidance as a social process and phenomenon. Therefore, she is interested in the social role and prescriptions assigned to career guidance aimed at contributing to social justice, and social change. The latter one has directed Anna towards the issues of agency and activism analyzed from the perspective of life-long learning and critical pedagogy. Anna's three main areas of activity are:

- Policy-oriented consultations: Anna is a national alternate consultant in CEDEFOP
- The Research on career guidance – she conducted a few research related to comparative analyses of career guidance systems, meanings assigned to “social justice” by career guidance practitioners, theoretical studies related to the issue of agency, etc. She cooperates with Polish and international researchers in the field.
- The Research on lifelong learning and adult education – Anna conducted a few research projects related to social activism, and the multicultural local communities.

Career guidance for immigrants and refugees as the way to social inclusion. Current trends and challenges

In this presentation the analysis of the current trends and challenges within career guidance for immigrants will be presented. Career guidance here is understood as comprehensive, open, and flexible process that incorporates a variety of career development practices for enhancing immigrants' vocational wellbeing, e.g. career conversation, diagnosis, vocational rehabilitation etc. The author will focus on the main tasks and concepts related to career guidance for immigrants from the perspectives of policy, social inclusion and (not)available practices. The presentation covers issues related to challenges for career guidance for immigrants, e.g. cultural differences, language issues or – from broader perspectives – discrimination and exclusion from the labour market. While the central focus is on the immigrants' careers, this presentation keeps in mind that career always intertwines with the personal biographies and experiences of world. Some example of practices conducted in Poland will be provided.

What practical counseling networks exist among Ukrainian refugees in the Loiret department (France)?

In my speech, I will outline the methodology of the project undertaken as part of the FIAS scholarship implemented at the University of Orleans. I will indicate the typology and structure of counseling networks constructed by refugees from Ukraine in the Loiret department. I will identify counseling activities undertaken by Ukrainian refugees and counselors existing in these networks

Conference in French

Psychologue, chercheur et professeur adjoint à la Faculté de Médecine de Petrópolis (FMP/Unifase/Brésil). Chercheur associé à l'Université Sorbonne Paris Nord, Centre de recherche Experice. Docteur en sciences de la santé par l'Institut National de Santé des Femmes, des Enfants et des Adolescents Fernandes Figueira (IFF/Fiocruz/Brésil). Membre et collaboratrice de l'Association Internationale de Histoires de Vie en Formation et de Recherche Biographique en Éducation (ASIHVIF). Ses recherches portent sur les pratiques de soins dans le contexte des maladies chroniques, la formation et l'auto-formation des professionnels de la santé et l'éducation et les apprentissages expérientiels.

Parcours de vie et ses tissitures : l'approche narrative et la construction des apprentissages expérientiels

Le but de cette communication est d'interroger l'intérêt de l'adoption de l'approche narrative dans la production des apprentissages expérientiels au cours d'un parcours de vie. Partant de la compréhension que le parcours de vie est un espace-temps qui prend forme au travers des expériences, invitant les individus à vivre des moments de changement, de réorientation, de transition, d'accélération, de décélération, de découvertes, de hésitations, de doutes, de certitudes, auxquels exercent des influences sur leur capacité d'agir et de réagir, la mise en mots de ces expériences devient un moyen et un support privilégié pour appréhender à la fois les expériences vécues et les apprentissages qui s'y dégagent.

Pour cela, il va falloir comprendre à la fois les régimes narratifs qui peuvent être mobilisés au cours d'un travail d'accompagnement de l'individu qui raconte son histoire et les relations qui s'établissent entre le vécu, sa mise en mots et l'identification des apprentissages expérientiels afin d'appréhender les tissitures qui se forment et qui donnent un contour, une forme, une expression à l'identité de l'individu.

**Dr Emilio Maria Sanfilippo & Xavier Rodier
FAIR Heritage: Digital Methods, Scholarly Editing and Tools for Cultural and Natural Heritage**

17-18 June 2020

Dr Margriet Hoogvliet & Prof. Chiara Lastraioli

Spatial Humanities and Urban Experiences During the Long Fifteenth Century

11 Mai 2020

Dr Thimmalapura Marulappa Vishwanatha & Dr Vincent Aucagne

Challenges and prospects in chemoselective ligations: from protein synthesis to site-specific conjugation

27-29 January 2020

Dr Arunabh Ghosh & Prof. Fouad Ghamouss

Towards Futuristic Energy Storage; paving its way through Supercapacitors, Li-ion batteries and beyond

22-24 January 2020

2019

**Dr Yuri Dancik & Dr Franck Bonnier
Skin Models in Cosmetic Science: Bridging Established Methods and Novel Technologies**

2 - 4 December 2019

**Dr Eric Robert, Dr Jean-Michel Pouvesle & Dr Catherine Grillon
International Meeting on Plasma Cosmetic Science**

25-27 November 2019

**Prof. Richard Freedman & Prof. Philippe Vendrix
Counterpoints: Renaissance Music and Scholarly Debate in the Digital Domain**

14-16 November 2019

**Prof. Manuela Simoni, Dr Frédéric Jean-Alphonse, Dr Pascale Crépeux & Dr Eric Reiter
Targeting GPCR to generate life, preserve the environment and improve animal breeding: technological and pharmacological**

challenges

16-18 October 2019

Prof. Akkihebbal Ravishankara & Dr Abdelwahid Mellouki

Climate, air quality and health: long-term goals and near-term actions

28 June 2019

Dr Wolfram Kloppmann

N and P cycling in catchments: How can isotopes guide water resources management?

18 June 2019

Dr Carmen Díaz Orozco & Dr Brigitte Natanson
Forging glances.

Images and visual cultures in XIXth century

Latin America

28-29 May 2019

DrTijen & Dr Gülçin Erdi

Rebel streets : urban space, art, and social movements

28 - 29 May 2019

Dr Marcelo Lorenzo & Prof. Claudio Lazzari

New avenues for the behavioral manipulation of disease vectors

21-23 May 2019

Dr Agnieszka Synowiec & Dr Christophe Hano

Biological Activities of Essential Oils

13-15 May 2019

Prof. Yiming Chen & Prof. Driss Boutat

2019 International Conference on Fractional Calculus Theory and Applications (ICFCTA 2019)

25-26 April 2019

Prof. Temenuga Trifonova & Prof. Raphaële Bertho

On the Ruins and Margins of European Identity in Cinema: European Identity in the Era of Mass Migration

2-3 April 2019

Dr Patrizia Carmassi & Prof. Jean-Patrice Boudet

Time and Science in the Liber Floridus of Lambert of Saint-Omer

27-28 March 2019

Dr Guillermina Dalla-Salda & Dr Philippe Rozenberg

Adapting forest ecosystems and wood products to biotic and abiotic stress

12-15 March 2019

Dr Vincent Courdavault & Prof. Nathalie Guivarc'h

Refactoring Monoterpenoid Indole Alkaloid Biosynthesis in Microbial Cell Factories (MIAMi)

5-6 February 2019

Dr Denis Reis de Assis & Prof. Hélène Blasco
Induced Pluripotent Stem Cells (iPSCs): From Disease Models to Mini-Organs

28-30 January 2019

2018

Prof. Marek Łos & Dr Catherine Grillon
Stem cells & cancer stem cells:

Regenerative medicine and cancer

11-13 June 2018

Dr Ewa Łukaszuk & Prof. Marie-Luce Demonet

Transcultural Mediterranean: in search of non-orthodox and non-hegemonic universalism(s)

30-31 May 2018

Prof. Vladimir Shishov & Dr Philippe Rozenberg
Wood formation and tree adaptation to climate

23-25 May 2018

Dr Ján Zábka & Dr Christelle Briois

Advances in Space Mass Spectrometry for the Search of Extraterrestrial Signs of Life

16-18 May 2018

Dr Massimiliano Traversino Di Cristo

& Prof. Paul-Alexis Mellet
From Wittenberg to Rome, and Beyond Giordano Bruno: Will, Power, and Being

Law, Philosophy, and Theology in the Early Modern Era

26-27 April 2018

Dr William Horsnell & Dr Bernhard Ryffel

Neurotransmitters: non-neuronal

functions and therapeutic opportunities

26-28 March 2018

Prof. Eric Goles & Prof. Nicolas Ollinger
Discrete Models of Complex Systems

19-21 March 2018

2017

Dr Kristina Djanashvili & Dr Éva Jakab Tóth
Is Multimodal Imaging an Invention with a Future? The Input of Chemistry

11-13 December 2017

Dr Emmanuel Saridakis & Dr Marc Boudvillain
Structural biology and biophysics of RNA-protein complexes

13-15 November 2017

Prof. Franco Pierno & Prof. Chiara Lastraioli
The Runaway Word. Languages and Religious Exile in the Renaissance

7-8 November 2017

Prof. Michiel Postema & Dr Ayache Bouakaz
Acoustic bubbles in therapy: recent advances with medical microbubbles, clouds and harmonic antibubbles

23-24 October 2017

Dr Mauro Simonato & Dr Jérôme Rousselet
Species spread in a warmer and globalized world

18-20 October 2017

Dr Sophie Heywood & Dr Cécile Boulaire
1968 and the boundaries of childhood

12-14 October 2017

Prof. Mihai Mutascu & Prof. Camelia Turcu
Globalization and growth in eurozone: new challenges

28-29 September 2017

Dr Mauro Manno & Prof. Richard Daniellou
The role of glycosylation on serpin biology and conformational disease

27-29 September 2017

Prof. Salvatore Magazù, Prof. Francesco Piazza, Dr Sivakumar Ponnurengam Malliappan, Dr Emilie Munnier

Recent advances in basic and applied science in cosmetics

3-5 July 2017

Dr Maria Clotilde Camboni & Prof. Chiara Lastraioli
The dynamics of the relationship with the more recent past in early modern Europe: between rejection and acknowledgement

20-22 June 2017

Dr Sohail Akhter & Prof. Chantal Pichon
Messenger RNA therapeutics: advances and perspectives

22-23 March 2017

Prof. Gary Gibbons & Prof. Sergey Solodukhin
GARYFEST: Gravitation, Solitons and Symmetries

22-24 March 2017

2016

Dr Mohammed Ayoub & Dr Eric Reiter
Antibodies Targeting GPCRs, Recent Advances and Therapeutic Challenges

24-25 November 2016

Prof. David Koester, Dr Bernard Buron & Dr Jean-Philippe Fouquet
Practical Engagements and the Social-Spatial Dimensions of the Post-Petroleum Future

7-9 November 2016

Dr Jorge Gutierrez & Dr Philippe Frank
Lipids, Nanotechnology and Cancer

10-12 October 2016

Dr Ferenc Kálmán & Dr Éva Jakab Tóth
Being Smart In Coordination Chemistry: Medical Applications

26-28 September 2016

7th French-Czech "Vltava" Chemistry Meeting
Advancing Chemistry through Bilateral Collaboration

5-6 September 2016

Dr Satyajit Phadke, Dr Chandrasekaran & Prof. Mériem Anouti

Future strategies in electrochemical technologies for efficient energy utilisation

7-9 September 2016

**Prof. Peter Bennett & Prof. Philippe Vendrix
Sacred/secular intersections in early-modern European ceremonial: Text, music, image and power**

11-13 July 2016

**Prof. Leandros Skaltsounis & Prof. Claire Elfakir
Olive Bioactives: applications and prospects**

4-6 July 2016

**Dr Mikhail Zubkov & Dr Maxim Chernodub
Condensed matter physics meets relativistic quantum field theory**

13-15 June 2016

**Prof. Brown-Grant, Dr Carmassi, Prof. Drossbach, Prof. Hedeman, Dr Turner & Prof. Ventura
Inscribing Knowledge on the Page: Sciences, Tradition, Transmission and Subversion in the Medieval Book**

6-9 June 2016

**Prof. Gary Gibbons & Prof. Sergey Solodukhin
Classical and quantum black holes**

30-31 May 2016

2015

**Dr Gyula Tircsó & Dr Éva Jakab Tóth
Medicinal flavor of metal complexes: diagnostic and therapeutic applications**

7-9 December 2015

**Prof. Erminia Ardissino & Dr Elise Boillet
Lay Readings of the Bible in Early Modern Europe**

24-26 November 2015

**Prof. Kathleen Campbell & Dr Frances Westall
Habitats and inhabitants on the early Earth and Mars**

17-18 November 2015

**Prof. Marion Harris & Dr David Giron
Insects, pathogens, and plant reprogramming: from effector molecules to ecology**

5-7 October 2015

Dr Arayik Hambardzumyan & Dr Sylvie Bonnamy

Bioinspired molecular assemblies as protective and delivery systems

7-9 September 2015

**Dr Peter Arensburger & Dr Yves Bigot
Analysis and Annotation of DNA Repeats and Dark Matter in Eukaryotic Genomes**

8-10 July 2015

**Prof. Scott Kroeker & Dr Pierre Florian
Nuclear Waste Disposal: Designing Materials For the End of Time**

27-29 May 2015

**Prof. Gary Gibbons & Prof. Sergey Solodukhin
Entanglement, Holography and Geometry**

17 April 2015

**Prof. Kari Astala & Dr Athanasios Batakis & Prof. Michel Zinsmeister
Conformal Methods in Analysis, Random Structures & Dynamics**

12 April 2015

**Prof. Kari Astala & Dr Athanasios Batakis
Loire Valley Workshop on Conformal Methods in Analysis, Random Structures & Dynamics**

12-16 April 2015

2014

**Dr Natalia Kirichenko & Dr Alain Roques
Insect invasions in a changing world**

17-19 December 2014

**Dr Alejandro Martinez & Dr Philippe Rozenberg
Natural and human-assisted adaptation of forests to climatic constraints: the relevance of interdisciplinary approaches**

18-19 November 2014

**Dr Magnus Williamson & Prof. Xavier Bisaro
Reconstructing Lost Spaces: acoustic, spatial, ceremonial contexts**

30-31 October 2014

**Dr Edoard Asselin & Dr Patrick D'Hugues
Copper, a strategic metal? The**

**present and future of resources,
processing and recycling**

14-15 October 2014

**Dr C. Oshman & Dr G. Poulin-Vittrant
Piezoelectric micro and nano-
structures and their applications**

25-26 September 2014

**Dr Eric Reiter
3rd International Congress on
Gonadotropins & Receptors - ICGRIII**

7-10 September 2014

**Dr Robin Beech & Dr Cédric Neveu
NemaTours: bringing worms together**

17-18 July 2014

**Prof. Gary Gibbons & Prof. Sergey Solodukhin
Gravitation, Solitons & Symmetries**

20-23 May 2014

**Dr Charles Sennoga & Dr Ayache Bouakaz
Targeted ultrasound contrast maging
and drug delivery**

19-20 May 2014

**Dr Igor Leontyev & Dr Louis Hennet
Heterogeneous catalysis: recent advances
in preparation and characterization**

31 March - 1 April 2014

2013

**Prof. Chandani Lokuge & Prof. Trevor Harris
Postcolonialism now**

4-5 February 2013

**Dr Fabrizio Gherardi & Dr Pascal Audigane
Geochemical reactivity in CO₂ geological
storage sites, advances in optimizing
injectivity, assessing storage capacity and
minimizing environmental impacts**

25-26 February 2013

**Prof. Marcos Horacio Pereira & Prof. Claudio Lazzari
Vector-borne diseases: a
multidisciplinary approach**

8-9 April 2013

**Prof. Marc Hillmyer & Prof. Christophe Sinturel
Bottom-up approaches to**

Nanotechnology

29-31 May 2013

**Dr Svetlana Eliseeva & Prof. Stéphane Petoud
Lanthanide-based compounds: from
chemical design to applications**

11-12 July 2013

**Prof. Pietro Roccasacca & Prof. Philippe Vendrix
Vision and image-making: constructing
the visible and seeing as understanding**

13-14 September 2013

**Prof. Reuben Ramphal & Prof. Mustapha Si-Tahar
Chronic inflammatory lung diseases:
The next-generation therapeutic
targets to consider**

20-21 September 2013

**Prof. Sergey Traytak & Prof. Francesco Piazza
Macromolecular crowding effects in
cell biology: models and experiments**

24-25 October 2013

**Prof. Mourad Bellasoued & Prof. Le Rousseau
Biology and mathematical inverse
problems: a new wedded couple?**

14-15 November 2013

2012
